Dear Sir/Madam,

**Sub: Publication of Unaudited Financial Results for the Quarter ended June 30, 2022**

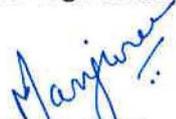

In compliance with the provisions of Regulation 47 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, please find enclosed herewith copies each of Financial Express (English Daily) and Arthik Lipi (Bengali Daily) both dated August 8, 2022 in which Unaudited Financial Results (Standalone as well as Consolidated) of the Company for the Quarter ended June 30, 2022 have been published. The aforesaid results have been approved by the Board of Directors at its meeting held on August 6, 2022.

Kindly take the information on your record.

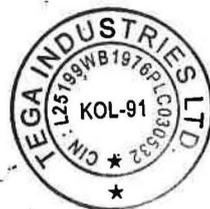

Thanking You,

Yours faithfully,

For Tega Industries Limited

  
Manjuree Rai

Company Secretary & Compliance Officer

## POOR RAIN IMPACT

## Rice yield seen 8% less than 2021-22

Govt may curb rice exports if free ration scheme stays through FY23

SANDIP DAS  
New Delhi, August 7

WITH SEVERE DEFICIENCY of monsoon rainfall in the eastern regions hitting paddy sowing activities, the country's rice production for 2022-23 crop year (July-June) may turn out to be at least 10 million tonne (MT) less than last year's record level of 129 MT, according to trade sources.

Paddy sowing has been adversely impacted in parts of Uttar Pradesh, West Bengal, Bihar and Jharkhand.

West Bengal, the biggest rice producer amongst states, has received deficient rainfall in 15 of its 23 districts, raising the likelihood of crop loss, an official said.

In East Bardhaman district, considered as rice bowl of West Bengal, the rainfall deficiency has been 34% of benchmark so far while other key grain producing districts — Murshidabad (-63%), East Midnapore (-35%) and Bankura (-48%) — too have received deficient rainfall. The state's overall deficiency in rainfall is 25% against the benchmark till Sunday.

There are concerns about rice stocks with the Food Corporation of India (FCI) depleting to a 10-year low level by April, 2023 year, if the free ration scheme is extended to the second half of the financial year. The government may have to impose some curbs on rice exports — though minimum export price or an export tax — if the scheme is extended. At present, however, the FCI has comfortable rice stocks of around 30.3 MT against buffer norm for July of 13.5 MT, excluding 14.4 MT of rice yet to be supplied by mills to FCI.

According to data released by the agriculture ministry on July 28, area under paddy sowing in West Bengal was 1.13 million hectare (MH) which was 48% less than the same period last year. Overall paddy sowing area across the country was reported at 23.15 MH which was 13% less than year ago level. The ministry did not release kharif crops sowing data last Friday.

West Bengal produced 16.6 million tonne (MT) of rice, more than 13% of the country's total

## Promise now, pay later ails country's power sector

MIHIR MISHRA  
NEW DELHI, August 7

AS THE DUES of power distribution companies (discoms) to power generators surge to unsustainable levels, with states holding back payments to be made to discoms for electricity supplies as well as against subsidies for free power schemes, the Centre is set to give distribution reforms a renewed push.

The Electricity (Amendment) Bill 2022, to be introduced in the ongoing monsoon session of Parliament, is likely to push state electricity regulatory commissions to take up timely revision of tariffs and catalyse competition in the retail power distribution sector, among other provisions.

This also comes amid a renewed debate on the freebie culture and the focus on the mounting dues of power distribution companies. According to latest government data, discoms of three states — Tamil Nadu, Maharashtra and Telangana — owed about 57% of total dues owed to power generating companies, followed by BJP-ruled Uttar Pradesh and Madhya Pradesh and the UTs of Jammu & Kashmir, which account for another about 26% of the total dues of ₹1,14,222 crore owed to power generation companies. Government data

West Bengal, the biggest rice producer amongst states, has received deficient rainfall in 15 of its 23 districts, raising the likelihood of crop loss

grain production of 122.2 MT in the 2020-21 crop year.

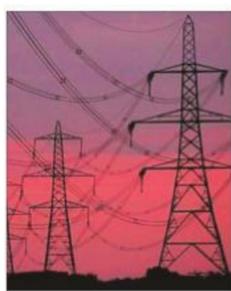

Uttar Pradesh, the second biggest producer of rice, has received 42% less rainfall than benchmark. Only 13 districts out of 75 in the state have received normal monsoon rainfall so far. The rainfall deficiency in the other eastern states Bihar (-34%) and Jharkhand (-48%).

"Deficiency in monsoon rainfall is going to hit around 15 to 20% of paddy area which is expected to pull down overall rice production," an official told FE. In terms of monsoon rains, the other key rice producing states such as Punjab (9%), Andhra Pradesh (29%) and Telangana (86%) have received above normal to excess rainfall against the benchmark — long period average (LPA) till Sunday. Odisha and Chhattisgarh have also received normal rainfall till now.

Officials said that it's too early to assess the impact of lower paddy sowing on overall rice production in the 2022-23 crop year. Around 80% of the country's rice production is grown in the kharif season while the rest is grown in rabi season.

The cumulative rainfall received during June 1-August 7 was 538 mm, which was 6% more than the benchmark (above normal level) of 509 mm for the same period. The south peninsula, central India and northwest India have received 37%, 9% and 1% more rainfall respectively than the normal range. Infall deficiency in northwest India and east and north east regions has been 15%.

However, according to the US department of agriculture, the rice outlook report for July has projected India's rice production to a record 130.5 MT.

updated till March 31, 2022, show that states owe ₹62,931 crore for services and another ₹76,337 against cost of freebies announced by them to state discoms. Among the states that have defaulted on payments to discoms, Telangana leads the chart with a cumulative outstanding of ₹11,915 crore, followed by Maharashtra at ₹9,131 crore. BJP-ruled Uttar Pradesh leads the pack among states that have not made payments to discoms for subsidies at ₹18,946 crore, followed by Madhya Pradesh at ₹16,240 crore. While the top three together owe ₹65,041 crore, the next three BJP-ruled states owe ₹29,280 crore, according to a PRAPTI (Payment Ratification And Analysis in Power procurement for bringing Transparency in Invoicing of generators) data till July 31, 2022.

## Climate change making forecast tough: IMD chief

PRESS TRUST OF INDIA  
New Delhi, August 7

CLIMATE CHANGE HAS hampered the ability of forecasting agencies to accurately predict severe events and the India Meteorological Department is installing more radars and upgrading its high-performance computing system to meet the challenge, IMD direc-

torgeneral Mrutyunjay Mohapatra said. He also said that the monsoon rainfall has not shown any significant trend, the number of heavy rainfall events has increased and that of light rainfall events has decreased due to climate change.

The impact-based forecast will improve to become "more granular, specific and accurate" by 2025 and IMD will be able to

provide forecasts up to panchayat level clusters and specific areas in cities in the coming years, the IMD chief told PTI.

"Climate change has increased the instability in the atmosphere, leading to an increase in convective activity — thunderstorms, lightning and heavy rainfall. The severity of cyclones in the Arabian Sea is also increasing. This increase in

the frequency of extreme weather events is posing a challenge to forecasters. Studies show that the ability to predict heavy rainfall is hampered due to climate change," he said.

The IMD is bolstering its observational network with the augmentation of radars, automatic weather stations and rain gauges and satellites to improve predictability, Mohapatra said.
